

## Plant Industry Forum

The Plant Industry Forum (PIF) was formed in 2006 for all Plant Industry Members of Plant Health Australia (PHA) to collaborate and progress common goals to strengthen Australia's biosecurity system.

### **Purpose**

The PIF provides a forum to discuss biosecurity issues, share insights, test ideas and help shape national approaches to preparedness and response.

It also strengthens relationships across sectors and ensures plant industries have a coordinated voice in national decision-making.

### **Membership**

PIF is chaired by Nathan Hancock (Citrus Australia).

Members comprise representatives from all Plant Industry Members of PHA.

### **Governance**

The Plant Industry Forum Committee (PIFC) is the leadership committee for the PIF with responsibility for providing strategic direction, governance and operational oversight.

A PIFC Support Officer based within Grain Producers Australia helps to coordinate key activities to ensure tangible progress on important priorities.

### **Administrative support**

Secretariat support is provided by PHA.

### **Related committees**

Plant Industries Biosecurity Committee - Formed in 2020 as a skills-based committee under the PIF to improve Australia's domestic plant biosecurity system.

### **Contact**

The PIFC Secretariat can be contacted at [pifc@phau.com.au](mailto:pifc@phau.com.au).
